

# Gorillas in the Mix

>>> A free public soundscape lecture and demonstration <<<

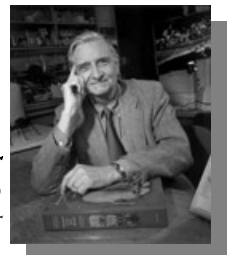

*Since 1968, Dr. Bernie Krause has traveled the world recording and archiving the sounds of creatures and environments large and small.*

**Thursday, December 4, 2008, 7:00PM**  
Montana State University  
Engineering and Physical Sciences (EPS) Building, Room 103

Working at the research sites of Jane Goodall, Birute Galdikas, and Dian Fossey, Bernie Krause conceived *The Niche Hypothesis*, -- an elegant explanation of the natural *biophony* comprising the biological soundscape within a given habitat.

**"BERNIE KRAUSE AND HIS NICHE THEORY ARE THE REAL THING. HIS ORIGINALITY, RESEARCH, AND ABOVE ALL BASIC KNOWLEDGE OF THE SOUND ENVIRONMENTS IN NATURE ARE IMPRESSIVE."**

**EDWARD O. WILSON**  
HARVARD UNIVERSITY, 3 NOVEMBER 2006
