## EELE 498 Internship Program Description

The officially recognized ECE Internship program usually involves a summer position with a sponsoring organization. Participation in the Internship program is voluntary but highly recommended for personal and professional growth and experience.

The ECE Department and MSU Career Services post information about Internships that have been announced by a sponsor, or a student may identify a sponsoring company individually through on-line research, personal contacts, or referrals.

The student requesting the Internship must identify the *mentor* (Internship supervisor) in the sponsoring organization. The student must also provide a brief written proposal/description of the work to be performed and a statement of goals *before* the Internship can be approved for credit. This document must be signed by both the student and mentor.

At the end of the Internship, the student is required to submit a written report to his/her mentor for review. This document must be signed by both the student and mentor and should make reference to the Internship proposal and statement of goals. This document will be reviewed by one or more ECE faculty members before a grade is assigned. In addition, the mentor is asked to provide a written performance review of the student using a form provided by the ECE Department.

Application for the Internship program (EELE 498) should be made to the ECE Department Head before final exam week of the semester prior to the Internship.
